

Neural Technologies finalist in IT Supplier of the Year Award 6th Sep 2010

Neural Technologies has been selected as a finalist for the IT Supplier of the Year Award by the **BCS & Computing UK IT Industry Awards 2010** in the Organisational Excellence category.

The BCS & Computing UK IT Industry Awards are a leading hallmark of success amongst practitioners in the IT industry and a platform for the entire profession to celebrate best practice, innovation and excellence.

Neural Technologies is no stranger to such success - it beat off competition from industry giants IBM, Sun Microsystems and Ericsson to win this prestigious award in 2008. The shortlisting this year recognises the company's work on a major fraud and credit risk management project carried out for leading Turkish mobile operator, Turkcell.

FINALIST

Said David Clarke, Chief Executive Officer, BCS, The Chartered Institute for IT, "Congratulations to all the finalists. They can be proud of their achievements. Their projects and work showcase the professionalism that exists among IT professionals and also highlights the value of IT today and the way it touches so many areas of society."

Added Robin Booth, Publishing Director of Computing, "I would like to add my congratulations to the finalists. The UK IT Industry Awards are rigorously judged and to be announced as a finalist is a great achievement. I don't envy the judges who now have to decide the winners; it's going to be very tough."

The winner will be announced at a presentation ceremony taking place at the Battersea Park Events Arena in London on Thursday 11 November 2010.

About the BCS & Computing UK IT Industry Awards

The UK IT Industry Awards (in association with Computing Magazine) are the benchmark for excellence throughout the computer industry. The Awards focus on the contribution of individuals, projects, organisations and technologies that have excelled in the use, development and deployment of IT in the past 12 months.
