Huawei Selects Sylantro Systems Feature Server to Enhance Global IMS Network

ITU Telecom World, Hong Kong, China, Dec. 4, 2006 - Huawei Technologies Co Ltd., a leader in providing next generation telecommunications network solutions for operators around the world and Sylantro Systems Corp., the leading supplier of feature servers for hosted VoIP services in carrier networks, today announced that Huawei has selected Sylantro's Synergy application feature server as part of its complete IMS solution for customers around the world.

Sylantro will be featured at the Huawei booth, #1002 in Hall 1, at ITU Telecom World in Hong Kong, China, Dec. 4-8, 2006. Sylantro will also be showcasing its Synergy application feature server at ITU in the U.S.A. Pavilion, booth #2001.8 in Hall 2.

"We have selected Sylantro as the most important application feature server in the market based on a comprehensive evaluation of their Synergy platform's features and scalability, as well as the company's ability to support our business," said Mr. Zha Jun, director of Huawei's IMS product line. "Huawei found Sylantro's Synergy to be an IMS/NGN compliant product. Its rich features and valuable applications integrate with

Huawei technologies to provide an enhanced IMS and NGN solution. Huawei will supply innovation to better meet market demand and help leading operators increase benefits, gain more new customers, and obtain maximum return on investment. “

“We are very pleased that Huawei, a leading provider in the global communications market, has selected Sylanro’s Synergy platform,” said Marco Limena, president and CEO, Sylanro Systems. “Sylanro’s advanced technology, which has completed interoperability testing through its IMS interface with the core IMS components of the leading vendors in the industry, will provide Huawei’s customers with an application feature server that will enrich Huawei’s IMS solution with a rich set of features and innovative services.”

About Huawei Technologies

Huawei Technologies is a leader in providing next generation telecommunications network solutions for operators around the world.
