Sylantro Systems Named to the 2007 Pulver 100

Campbell, Calif., March 12, 2007 – Sylantro Systems Corp., the leading supplier of feature servers for hosted VoIP services in carrier networks, today announced that it has been named to the 2007 "Pulver 100" – the IP communications industry's premier listing of privately-held growth companies that represent the future of the IP-voice and video communications ecosystem. Sylantro has been named to the list due to its cutting edge technology, most notably the Synergy Application Feature Server, as well as its leadership in global deployments.

"Pulvermedia is proud to name Sylantro to this year's Pulver 100," said Jeff Pulver, founder and chairman of pulvermedia. "Sylantro's demonstrated leadership and innovation, particularly with the launch of its Synergy 4.1 (Wireless Virtual PBX) solution in October 2006, make the company a strong delegate for the future of IP communications."

"Sylantro is honored to be included in the Pulver 100," said Frank Salm, vice president of marketing, Sylantro Systems. "This award acknowledges Sylantro's commitment to the advancement of our mobile initiatives via IMS support and deployments, as well as the Wireless Virtual PBX."

Synergy is the world's leading applications feature server for hosted VoIP applications. Global deployments range from landline and wireless to large and small scale, to customized and turnkey—Synergy provides a hardened, carrier-grade platform that supports multiple deployment options and applications that make carriers successful.

The Synergy platform provides standards-based interfaces and meets the highest standards of redundancy, massive scalability, regulatory, and Operations, Administration, Maintenance and Provisioning (OAM&P) requirements that service providers can rely on.

About the pulver 100
Originally introduced in 2002, the Pulver 100 features private companies that impact the distribution of communications and entertainment with Internet technology. These companies have substantial real-world deployments and enjoy significant growth rates. The value chain characterized by the Pulver 100 differs from the vertically integrated model of the last century, focusing more on the direct interface to customers and consumers which has been brought about by the Internet.
