New iPhone² Service Leverages Sylantro Platform for User-Friendly, Feature-Rich Video-Enabled Consumer VoIP Service

Unique Soft Client for Voice and Video, Coupled with Advanced Features and Telco-Grade Platform, Provide an Attractive New Alternative for Consumer VoIP Users

CAMPBELL, Calif., May 25, 2005 – Sylantro Systems Corporation today announced that iPhone², Inc., an enhanced service provider targeting the consumer Voice over IP (VoIP) market, has selected the Sylantro applications feature server to power the company's new ImagePhone service offering. The ImagePhone service is the next generation of softphone, allowing customers to make unlimited point-to-point voice and video calls, as well as make or receive voice calls from anywhere in the world. ImagePhone will be launched throughout the U.S. in June 2005. ImagePhone will also be available soon thereafter in select countries worldwide through existing and planned distribution agreements and strategic acquisitions.

The Sylantro solution provides basic and advanced VoIP capabilities as well as video routing and management for iPhone²'s ImagePhone soft-client. The service includes Sylantro-based features such as virtual phone numbers, conferencing, malicious call trace, user-defined call forwarding and browser-based portals for access and control of features and settings.

"We are planning to grow the iPhone² service very aggressively through our domestic and international efforts and business relationships," said Chip Greenberg, president of iPhone². "We needed a scalable, highly reliable platform, advanced features, and extensive deployment expertise with high-performance, high-volume applications such as ours. In Sylantro we found

the carrier-grade platform and differentiating features we require, along with an inter-disciplinary team approach that has proved invaluable in our deployment and initial business and marketing planning.”

Sylanro Systems is the leading provider of hosted PBX, IP Centrex and consumer broadband voice applications via the company’s telco-class applications feature server. Sylanro’s products are the choice of Tier-1 carriers across the globe, and have achieved the widest market distribution in their product class. The Sylanro platform provides the scalability, reliability, operability and regulatory compliance required for massively scalable carrier deployments to serve millions of users.

“iPhone² is planning to launch our hosted PBX and IP Centrex solutions for enterprise customers in Q3 of 2005,” said Greenberg. “We’re excited about fully leveraging the Sylanro platform’s capabilities to offer customers the next generation of hosted services.”

“iPhone² is a great example of the new type of consumer VoIP offering that is revolutionizing the way that users communicate,” said David Illing, senior vice president of marketing and operations for Sylanro Systems. “By combining voice and video capabilities in a sleek, user-friendly interface, powered by Sylanro’s industry-leading technologies, iPhone² is well-positioned to capitalize on the dynamic and fast-growing consumer VoIP market.”

About iPhone², Inc.

iPhone² is an enhanced service provider marketing a unique video-enabled soft agent to consumers. Our iPhone² service, called ImagePhone, is the next-generation of softphone, allowing customers to make point-to-point voice and video calls, as well as make or receive voice calls from anywhere in the world. iPhone² is a wholly owned subsidiary of Global Technology Resource Holdings Corporation, a Nevada corporation. About Sylanro Systems Corp.

Sylanro Systems provides the premier software platform for advanced IP Centrex and hosted communications services for business, residential, wireless and other applications. The company leads the market in deployments, with carriers such as SBC (NYSE:SBC), PTTs such as Swisscom, and next-generation service providers such as NuVox and Covad (COVD.OB) using the Sylanro platform. With a unique combination of advanced applications, a carrier-class platform, and proven go-to-market services, Sylanro allows service providers to rapidly deliver high-value, high-margin managed telephony services. These award-winning solutions offer business users sophisticated communications services without the cost and complexity of today’s in-house PBX and key systems, and give consumers new flexibility in their communications services. Sylanro is a privately held company backed by premier investors. On the Web: www.sylanro.com
