## **Sylantro Systems Appoints Marco Limena President and CEO**

### ***Communications Veteran Tapped to Lead Sylantro Through High Growth Phase of Global Expansion***

Campbell, Calif., Nov. 7, 2006 - Sylantro Systems Corp., the leading supplier of feature servers for hosted VoIP services in carrier networks, today named Marco Limena president and chief executive officer, effective immediately. Limena, former vice president of Hewlett Packard's multi-billion dollar Network and Service Provider Solution business, assumes the role from Sylantro president and CEO Pete Bonee, who now serves as Sylantro's chairman.

Limena joins Sylantro with extensive international communications and business management experience, having spent more than 14 years at HP where he had global responsibility for HP's Network and Service Provider Solution business and focused on serving key telecom operators, equipment manufacturers and media companies. Under his leadership HP experienced global success with innovative solutions in the network domain, next generation OSS, service delivery and content distribution platforms.

Limena was responsible for all strategic initiatives, industry solutions and partner relationships for the communications group throughout North America, Europe and Asia. He also contributed to the HP office of strategy and technology for key corporate initiatives including mobility and digital media.

“Sylantro is perfectly positioned to meet the needs of the emerging global telecommunications market, with its ability to deliver a rich and hardened platform for IMS and seamless mobility deployments through its global partners,” said Marco Limena, president and CEO, Sylantro Systems. “I look forward to working with Sylantro’s executive management team and their partners as they scale the business and continue the momentum established with their global base of service providers.”

“After an extensive and diligent search, we have selected an outstanding individual with a strong track record in our industry to lead Sylantro through its next stage of high growth and global expansion,” said Pete Bonee, chairman, Sylantro Systems. “Marco’s leadership skills and experience in managing global organizations and service provider initiatives make him the perfect leader for Sylantro as we continue to grow. I will work closely with Marco as I assume my new role as chairman.”

Prior to becoming vice president of the Network and Service Provider Solution business, Limena ran worldwide marketing and business development for HP’s communications industry business unit. He was also responsible for leading the team that combined the telecommunication organizations and products from HP, Compaq, Digital Equipment and Tandem into a new business unit. Limena started his career at HP Italy in 1992, and cultivated his success and responsibilities in several sales, marketing, consulting and integration roles until his global appointment to the company’s headquarters in 2000.

In addition to his vast experience at HP, Limena serves as a board director and advisor in public and private companies and in key industry organizations like the TeleManagement Forum.

Limena received a master’s degree in electrical engineering from the Department of Information Engineering at the University of Padua and has attended business management programs at INSEAD, Fontainebleau and MIT’s Sloan School of Business. Limena is fluent in English and Italian.

**About Sylanro Systems Corp.**

Sylanro Systems provides the premier software platform for business, consumer, and mobile hosted VoIP solutions. Sylanro allows network operators to rapidly deliver high value, high margin managed telephony services without the cost and complexity of today's in house PBX and key systems, giving users new flexibility in their communication services. Sylanro customers include AT&T, Bandwidth.com, China Netcom, China Unicom, Covad, One IP Voice, StarHub, SunRocket, and Swisscom. Sylanro is headquartered in Campbell, Calif.
