Accelerating Growth in Deployments of Hosted VoIP Services Fuels Strong Attendance at Sylantro Global Summit 2005

SYLANTRO GLOBAL SUMMIT, LAS VEGAS, September 12, 2005 – Sylantro Systems, provider of the most widely deployed platform for IP Centrex and hosted communications services, announced today that the first annual Sylantro Global Summit 2005 has opened with more than 250 attendees, with representation from more than 50 service providers from 15 countries across 5 continents. As hosted Voice over IP (VoIP) services continue their strong adoption curve among business and consumer users, the Sylantro-focused conference and exposition has drawn a global audience of top-level executives, with representation from Canada, China, Croatia, Finland, Italy, Japan, the United Kingdom, France, Korea, Malaysia, Mexico, Norway, Switzerland, the United States, and other nations.

The Sylantro Global Summit 2005 takes place September 12 through 14 at the exclusive J.W. Marriott Resort and Spa in Las Vegas, Nevada. Designed as an open forum for service providers deploying hosted communications services, the Summit features an information-packed conference filled with technical and marketing best practices, case studies, business models and deployment considerations. On Tuesday September 13, MIT professor Thomas Malone, author of *The Future of Work*, will discuss how changes in communications have and will continue to impact social and management structures. Throughout the event more than 30 Sylantro partners and sponsors, including Microsoft, Siemens, IBM and Polycom, will provide demonstrations and exhibits of the industry's best-of-breed technologies and applications.

"Sylantro has been a valued partner in the deployment of our hosted VoIP services by providing technology leadership and practical market strategies and tactics that have helped us get to

market quickly and efficiently,” said Adrian Weber, senior business development manager of service provider Swisscom Fixnet Ltd. “The Sylanro Global Summit is a great opportunity for us to share our experiences and to learn from the deployments of other service providers throughout the world, as well as to keep abreast of the latest advances in Sylanro’s platform and those of its partners.”

“We are proud to host the world’s leading incumbent and next-generation service providers, as well as our partners, the industry’s leading technology and applications companies, in this focused venue,” said Pete Bonee, president and CEO of Sylanro Systems. “As hosted VoIP services continue to gain momentum in the business and consumer markets, the Sylanro Global Summit provides a valuable conduit for Sylanro, our customers and partners to exchange information, key learnings and real-world experiences in deploying these revenue-generating services.”

During the Summit, Sylanro will demonstrate the latest hosted messaging and collaboration solutions with the Sylanro Systems Release 4.0 application feature server software.

Sylanro Systems is the leading provider of business, consumer and wireless broadband voice applications via the company’s telco-class applications feature server. Sylanro’s products are the choice of Tier-1 carriers across the globe, and have achieved the widest market distribution in their product class. The Sylanro platform provides the scalability, reliability, operability and regulatory compliance required for massively scalable carrier deployments to serve millions of users. About Sylanro Systems Corp.

Sylanro Systems provides the premier software platform for advanced IP Centrex and hosted communications services for business, residential, wireless and other applications. The company leads the market in deployments, with carriers such as SBC, PTTs such as Swisscom and China Unicom, and next-generation service providers such as Elitel and Covad using the Sylanro platform. With a unique combination of advanced applications, a carrier-class platform, and proven go-to-market services, Sylanro allows service providers to rapidly deliver high-value, high-margin managed telephony services. These award-winning solutions offer business users sophisticated communications services without the cost and complexity of today’s in-house PBX and key systems, and give consumers new flexibility in their communications services. Sylanro is a privately held company backed by premier investors. On the Web: www.sylanro.com
