Sylantro Systems to Provide Advanced Telephony Applications for Swisscom's Future IMS Network

Bern, Switzerland and Campbell, Calif., Feb. 12, 2007 – Swisscom, the leading telecommunications company in Switzerland, and Sylantro Systems Corp., the leading supplier of feature servers for hosted VoIP services in carrier networks, today announced an enhanced relationship that will enable Swisscom's transition to an IMS (IP Multimedia Subsystem) network, planned to launch throughout Switzerland in early 2008. Sylantro's Synergy Application Feature Server will be deployed and integrated into Swisscom's IMS network infrastructure, providing advanced telephony services and first line replacement.

As Swisscom prepares for major developments on residential VoIP services over the next year, the company is migrating to IMS to enable advanced fixed and mobile services based on a converged network infrastructure.

"Sylantro's Application Feature Server will be deployed and integrated into the IMS network we selected, which will provide value-added services such as residential VoIP to our customers," said Wolfgang Weber, CTO Mobile, Swisscom. "Swisscom has had a positive and successful partnership with Sylantro over the last two years."

"In the evaluation process with Swisscom, Sylantro was able to demonstrate its leadership in supplying an IMS-ready application platform," said Marco Limena,

president and CEO, Sylanro Systems. "Swisscom and Sylanro will collaborate on this leading-edge project to provide highly innovative, advanced VoIP services to customers throughout Switzerland."

About Sylanro Systems Corp.

Sylanro Systems provides the premier software platform for business, consumer, and mobile hosted VoIP solutions. Sylanro allows network operators to rapidly deliver high value, high margin managed telephony services without the cost and complexity of today's in house PBX and key systems, giving users new flexibility in their communication services. Sylanro customers include AT&T, Bandwidth.com, China Netcom, China Unicom, Covad, StarHub, SunRocket, and Swisscom. Sylanro is headquartered in Campbell, Calif.
