

Imtech Telecom and World Wide Packets Build On Successful Partnership

Strategic Relationship Yields Tremendous Growth in European Broadband Market

SPOKANE VALLEY, Wash.--(BUSINESS WIRE)--Feb. 1, 2005--World Wide Packets, the leading provider of Ethernet Access networking solutions, has partnered with Imtech Telecom as part of its European expansion. Working with Imtech Telecom, World Wide Packets has already achieved remarkable results with leading service providers throughout Europe. Most notably, the partnership with Imtech Telecom has led recent deployment of World Wide Packets' Ethernet access gear at Telewest Business, a leading supplier of broadband communications to the public and private sector markets in the UK.

"Our relationship with Imtech Telecom is an integral part of our remarkable growth in the European broadband market," said Dave Curry, president and CEO of World Wide Packets.

"Combining Imtech Telecom's technical expertise with our world-class products creates a compelling broadband access solution for Europe's largest telecommunications operators. As we expand our presence abroad, we depend on Imtech Telecom to deliver market-leading technical services to help drive that growth."

Imtech Telecom offers a full range of network infrastructure services, including consultancy, design, construction, installation, operations and maintenance of mobile and fixed network infrastructures throughout Europe. Imtech Telecom was responsible for supply and installation of World Wide Packets' LightningEdge(R) suite of Ethernet access products which deliver broadband services platforms to Telewest Business. Imtech Telecom will provide ongoing support and maintenance of all World Wide Packets' equipment involved in Telewest Business' impressive rollout of National Ethernet services.

"To complete our ambitious project to deliver Ethernet services to business customers throughout the UK, we required a solution provider that can easily scale to meet our needs," said Alison Adams, Senior Product Manager, Telewest Business. "As the number of networks grows, we look forward to working with Imtech Telecom and World Wide Packets to deliver the best service possible to our subscribers."

"We are happy to work with World Wide Packets to provide broadband access solutions to Telewest Business that deliver voice, video and data services with a level of QoS, resiliency and scalability that meet the most rigorous demands of enterprise customers," said James Morgan, managing director of Imtech Telecom. "Imtech Telecom provides best-of-breed solutions based on a foundation of technical excellence. Our ability to provide expert support and operational services is complemented by products from companies like World Wide Packets."

About World Wide Packets

World Wide Packets LightningEdge™ Ethernet service delivery access network solution, enables delivery of simultaneous telephony, business and entertainment video, broadband data, and Internet access services, to any combination of business and residential subscribers, using Ethernet over fiber and copper medium. By bringing together the limitless bandwidth capabilities of a fiber infrastructure with the affordability and proven performance of Ethernet, these networks eliminate the constant bandwidth challenges now facing network operators. World Wide Packets is a privately held corporation, and a recognized pioneer of Ethernet geographic network solutions.
